# COMPACT **UNIT SAPHIR**

## SPARTHERM **LEAN** SERIES

Fire love. For a lifetime.

# SAPHIR

A compact  
eye-catcher

This design is perfect for small spaces: The innovative compact unit Saphir, characterised by its particularly low unit depth, was developed for houses and flats with little space or low heating requirements. The zero-centimetre wall clearance of this flat model makes the design even more compact. It means that the Saphir may be placed directly against the wall. The result: The compact unit takes up little space while still offering an impressively wide fire panorama.

And there are environmental benefits, too: The elegant Saphir is not just visually stunning; its compact format also ensures efficient and therefore sustainable use of wood as fuel.

## SMART FIREPLACE ASSISTANCE FUNCTIONS

S-Thermatik NEO  
(combustion control)

S-USI II  
(underpressure control)

S-ESAM 3.0  
(automatic sliding door)

## COLOURS
